## THE AUTOPSY.

New York, 3.—The Medical News of Philadelphia, furnishes the official report of the post mortem examination of the body of Charles J. Guiteau. The report is signed by the orbital surface on right slide were seven fissures radiating from the circular fissure radiating from D. S. Lamb, and dated Army Medical Museum Washington, July 4th. The report is as follows:

Thirty head of young horses for stated that as it came from the sponsible figures, at California corrai. Apply early to C. P. Brizzee on the premises.

Thorefore a corrai is a special to the premises.

Thirty head of young horses for stated that as it came from the sponsible figures, at California corrai. Apply early to C. P. Brizzee on the premises.

Thorefore a committee on commerce, stated that as it came from the sponsible, the examination was not head of a temporal lobe; the right was a half after death, in consequence of which photographing was less successful and the cast impracticable. The body, which was of a faint yellowish tint, was that of a man about the tempora occipital, asmall bridge appropriation for the Hennepin Seventh South street; \$15 per month. Enquire of John Wayman on the premises.

The dura slightly thickened along the longitudinal fissure in the vicinity of paechienian granula civil appropriation bill.

Hiscock, of New York, made an elaborate speech in explanation of the increase in the appropriation made by the present Congress over made by the present Congress over anteriorly; posteriorly was slightly As played in the Town of the Castle Clock on the Brine, Germany.

During the play Ma. EMMET will introduce the following songs and dances: "The Bellis are Ringing," "The Swell," "The Cuckoo Song," "The Schamptock," "Witheindrick Strauss" "The Brother's Lulisby," "I Know What Love is," All composed by J K Emmet Admission: St. 75 cis., 50 cis., and 25 cts. Owing to the immense expense attending the engagement of this Great Company, reserved seats will be 25 cts. extra. Box office open Friday morning at 9 of clock.

In adde by the present Congress over those made in previous Congresses, and in praise of the action of the republican majority in passing the general legislation bills demanded by the country, instancing as such the anti-Mormon, anti-Chinese, tar-iff commission and internal revenue measures.

Blackburn, of Kentucky, briefly replied and criticised the majority for not having before this late day, was slightly flattened in the Blackburn, of Kentucky, briefly replied and criticised the majority for not having before this late day, passed the general appropriation bills provided for the support of the government.

Blackburn, of Kentucky, briefly cerebellum pans and medulia and a portion of dura, 40½ ounces; it was slightly flattened in the region corresponding to the flattening of the parretal bone above mentioned. On section of above mentioned. On section of cerebrum was an appearance as of Willis, of Kentucky, criticised the cerebrum was an appearance as of of the British ship Lammermoor Willis, of Kentucky, criticised the bill for the omission to make appropriation for the purpose of inaugurating the administration of reform, and attacked the system of political assessment, characterizing it as the sum of all villianies.

Correbrum was an appearance as of slight tourning of gray cortex; measurement taken, however, gave the depths of 1-16 to 1/2 inch in close proximity to each other. The white substance was almost absolutely anaemic. The cerebellum and intended first ware both covered on it as the sum of all villianies. anæmic. The cerebellum and Bayne, of Pennsylvania, also island of reil were both covered on made a speech in favor of civil ser-vice reform. He criticised the pressented considerable depth in many ent administration, declaring it was as unlike that of President Garfield as the administrations of Jackson The right fissure of sylvius, typical and Van Buren were unlike those of Washington and Jefferson. Garfield believed in a reign of law. The present executive is a personal government. The bullet of Guiteau that forehead had made a mark on the forehead arated only by a small bridge deeply of stalwartism that could never be situated, and both were separated from the longitudinal fissure. First

The committee rose and the House frontal fissure, on right side, was not connected with that of relando, but the posterior part was crossed by a secondary fissure; same on left side, except that the fissure was crossed by a small bridge near the centre. The second and third frontal fissures presented nothing remarkwere well defined and unminated in a transverse occipital separated only by a slight bridge. The parieto occipital was well marked on each side; transverse occipital fissure on right side, ill de-

right side to a line about half an nch in front of the parieto occipital fissure, from which it was sep

the circular fissure, surrounding small isolated convolution; on the left side five fissures radiating from a small shallow depression. Left
